About Your Risk Profile

This Questionnaire looks at your attitude to investing, your understanding of financial markets and how you may react during certain investment market and economic conditions. Financial planning is a long-term process and many of the investments are also long-term in nature. However, while long-term growth is generally achieved, it may come with periods of negative returns. To ensure your financial goals are reached, generally you must remain invested true to your financial plan during these periods.

The following questions help us understand your tolerance for financial risk. The information gives us an overall understanding of your investment profile and helps us understand what investment mix and products will be appropriate, or inappropriate, in helping to achieve your investment goals.

How to complete this questionnaire

- There are no incorrect answers. Simply tick the box next to the most appropriate answer for you.
- When you have answered all questions, add up your score to determine your investor risk profile.
- *Couples*: It is best to answer the questions on an individual basis as risk tolerance, and understanding of financial markets can vary. However, you can choose to complete the questionnaire together; in this instance use the 'Joint' column.

In the context of investing, what best describes your attitude to risk?

	Client 1	Client 2	Joint	Score
It is something to be avoided	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1
It is a source of uncertainty and needs to be limited	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2
It can create the opportunity for improved returns	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3
It is something to be embraced	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4

If asked to make your own investment decisions how would you feel?

	Client 1	Client 2	Joint	Score
Not confident at all	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1
Somewhat hesitant	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2
Reasonably confident	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3
Very comfortable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4

If you held a sizable investment that regularly went up and down in value, which would you be likely to do?

	Client 1	Client 2	Joint	Score
Watch its progress daily or weekly as I'm likely to be anxious about investment performance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1
Watch its progress monthly out of concern over investment performance	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2
Watch its progress regularly, not out of concern, but just for general interest	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3
Only check its progress once or twice a year	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4

How would you feel if a large percentage of your investment portfolio was invested in the share market?

	Client 1	Client 2	Joint	Score
Very comfortable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4
Reasonably comfortable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3
A little hesitant but willing to consider it	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2
Not comfortable	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1

In order to earn a return above the level of bank interest rates you may need to hold investments that go up and down in value (i.e. have volatility). How important is it to you to protect your investment and minimise the prospect of any fall in the value?

	Client 1	Client 2	Joint	Score
Very important. Protecting my existing investment is my main objective.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1
Important, but I'm comfortable for at least a small part of my portfolio to have volatility in order to improve returns over the longer term.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2
Somewhat important but I'm prepared to take on a reasonable amount of volatility in order to increase my chance of higher returns over the longer term.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3
Not particularly important as I'm comfortable that having exposure to volatility is the best way to maximise returns over the longer term.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4

If you owned a large amount of shares and the stock market fell quickly by 20%, what do you believe your natural reaction would be?

	Client 1	Client 2	Joint	Score
To sell all the shares as soon as possible to avoid any further falls	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1
To sell some of the shares to reduce exposure to future falls	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2
To hold the shares and wait for a recovery	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3
To look for ways to buy more shares	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4

Investments that go up and down in value in the short-term (i.e. have volatility) are more likely to produce higher returns than investments that remain steady. Are you prepared to experience volatility in your investments in order to increase the chance of higher returns?

	Client 1	Client 2	Joint	Score
Yes, definitely	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4
Yes, for a significant part of my investment portfolio	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3
Yes, but only for some of my investment portfolio	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2
No, not at all	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1

Score	Profile	Description
11– 17	30% Growth	<p>This portfolio is suitable for investors seeking a relatively low-risk investment. They don't want to aim for higher returns if it means their portfolio may decrease significantly in value. This is a defensive portfolio and will only have an allocation of around 30% to growth assets such as shares and property.</p> <p>Capital is not guaranteed and there is some risk of a portfolio decreasing in value, although this is substantially reduced for investments over the recommended minimum investment term of three years.</p>
18 - 26	50% Growth	<p>This portfolio is suitable for investors seeking an investment which balances risk and return. There will be an allocation of around 50% to growth assets such as shares and property. Capital is not guaranteed and there may be fluctuations and some negative returns from year to year.</p> <p>There is a risk of a portfolio decreasing in value although this is substantially reduced for investments over the recommended minimum investment term of five years.</p>
27 – 32	70% Growth	<p>This is a portfolio for investors who seek a balance between risk and return. They are prepared to invest for a long term and ride out periods of negative returns provided they may benefit from higher returns. The Balanced portfolio will have a large allocation of around 70% to growth assets such as shares and property. There may be some large fluctuations and some negative returns from year to year.</p> <p>There is a significant risk of a portfolio decreasing in value in the short term although this is substantially reduced for investments over the recommended minimum investment term of seven years.</p>
33 – 36	85% Growth	<p>This is a growth portfolio and is suitable for investors seeking a higher return investment. They are prepared to invest for a long term and ride out extended periods of negative returns provided they may benefit from higher returns. The Growth portfolio will have a large allocation of around 85% to growth assets such as shares and property. There may be large fluctuations and some negative returns from year to year.</p> <p>The recommended minimum investment term is eight and a half years.</p>
37 - 40	100% Growth	<p>This portfolio is suitable for investors seeking a higher return investment. NOTES:

- Minimum timeframe refers to the minimum period of time an investor should be prepared to remain within a given benchmark portfolio.
- Frequency of a negative return does not mean you cannot experience multiple years of negative returns. It reflects a distribution of expected return outcomes relative to the expected risk of the strategy.
- Extreme return range – 99% of results are expected to fall in this range.
- Normal return range – 2/3rds of annual results are expected to fall in this range.
- This information was obtained from Morningstar and considered to be reliable, however we do not guarantee it is accurate or complete. The direct property and Cash rate were provided by AMP Capital and AMPA Research respectively. The information in this publication is current as at May 2021 and may change over time. Past performance is not a reliable indicator of future performance.
- This table contains information that is general in nature. It does not consider the objectives, financial situation or needs of any particular person. You need to consider your financial situation and needs before making any decisions based on this information.
